Introduction to Research Methods
Online study unit

This online study unit is an elective unit of the Multidisciplinary Mental Health Programs but may also be undertaken as a standalone unit for professional development.

This unit provides an introduction to research design.

The focus is on learning about methods of conducting research and how to critically analyse the research literature.

Students will be introduced to a range of methods from case studies to randomised controlled trials.

Strengths and weakness of different methods are considered, terminology explained and ethical considerations outlined.

Teleconferences & web forums will be used throughout the unit.

Attendance at a 2-day workshop at NSWIOP in Parramatta is compulsory for those undertaking the standalone unit.
