Orientation to Child and Adolescent Mental Health

Online study unit

This online study unit is a core unit of the Graduate Certificate in Mental Health (Child and Adolescent) but may also be undertaken as a standalone unit for professional development.

This unit provides an overview of the core skills required for clinical practice with children, adolescents and their families.

Topics include the use of diagnosis and classification systems in assessment and formulation and the application of intervention strategies in child and adolescent mental health problems.

Participants will be introduced to a biopsychosocial approach to assessment and treatment and cover ways to involve a broader systemic framework.

Clinical case examples will be used to review and highlight this approach.

Registrations: To register for this unit, please complete the 2014 Course Application Form (on our website or ask us to send you one) and return the completed form with your payment details to the Registrations person.
