This online study unit is a core unit of the Graduate Certificate in Mental Health (Older Person) but may also be undertaken as a standalone unit for professional development.

This unit introduces general concepts of health and ageing. Topics will cover: core concepts in the normal ageing process; demographic characteristics; biology; social theories; and psychological aspects of ageing.

The subject draws on theoretical perspectives of ageing, health promotion and issues related to late life.

This unit as a self-directed learning module involves: selected reading materials, submission of study tasks and assignments.

Attendance at a 1-day workshop at NSWIOP in Parramatta is optional for those undertaking the standalone unit.

Complete this unit as a standalone unit of study for continuing professional development (CPD)
OR
Complete this unit as part of the accredited degree program: Graduate Certificate in Mental Health (Older Person)
